SmartUp ERP — School Normalization & Clubbing Guide

Quick Reference Guide for Director & Admin Review

Explains why school names appeared fragmented and how variations are mapped to single official school rows.

Generated: 15 Oct 2026 • Total Students Analyzed: 1,703 • Distinct Raw Entries: 463

1. How It Works (At A Glance)

Before: Fragmented Data in Reports

Staff at different branches enter free text during student admissions (e.g. typing "Fatima", "FATHIMA GHS", "fatima ghs"). This created multiple separate lines for the same school in reports.

After: Single Clean Canonical Row

The ERP now dynamically groups all typos, abbreviations, and informal names into 1 unified school row in real time without altering database records or risking data loss.

2. Concrete Example: Fatima Girls High School

Raw Name Entered During Admission	Student Branch	Previous Result	New Result (Unified)
Fatima Girls High School, Fort Kochi	Fort Kochi	Row 1 (50 students)	**Fatima Girls High School, Fort Kochi**
FATHIMA GHS	Palluruthy	Row 2 (1 student) [Missed "th"]	**Fatima Girls High School, Fort Kochi**
Fathima	Mattancherry	Row 3 (1 student) [Missed "th"]	**Fatima Girls High School, Fort Kochi**
FATIMA	Various	Separate rows	**Fatima Girls High School, Fort Kochi**
Fatima ghs fortkochi	Fort Kochi	Separate rows	**Fatima Girls High School, Fort Kochi**

3. Complete School Mapping Reference Table

#	Official School Name (In ERP)	All Clubbed Variations & Typos	Students
1	**Fatima Girls High School, Fort Kochi**	FATIMA, Fatima, Fatima ghs, FATHIMA GHS, Fathima, FATIMA GIRLS, FATIMA G H S FORTKOCHI, FATIMA GIRLS HIGH SCHOOL, Fatima girls high school, FATIMA H S, FATIMA G H S, St Mary's Fatima, ST FATIMA, ST FATIMA HSS, Fatima Girls High School, Fort Kochi, Fatima HSS, Fort Kochi, Fatima AIGHS, Fortkochi, Fatima GHS, Fort kochi, Fatima ghss, Fathima ghs	**99**
